SERVICES DETAILS

FLOOR RECOVERY

Restoration and treatment of all types of flooring (porcelain, marble, granite, etc.).

NATURAL POLISHING: A widely used procedure as it maintains the natural appearance of the coating, using the most advanced technology in the global market.

ARTIFICIAL TREATMENT: Well known and used for several years. It involves cleaning, sealing, and waterproofing, but requires frequent maintenance.

GRANITE AND MARBLE HONING: Wear and tear from high traffic or time creates the need for honing, thus prolonging the useful life and restoring naturalness, avoiding the excessive consumption of artificial products like sealers and waxes that offer temporary shine.

Today, Fundamental has the largest number of polishers and trained operators to meet any occurrence in the region, whether corporate or in large and small companies.

POST-CONSTRUCTION CLEANING

Fundamental is a company with the technical capacity to meet all post-construction cleaning needs, as we have specialized labor for floors, high-altitude glass, removal of construction debris, stones of all types, and permanent supervision.

The appropriate materials and products for each stage, from heavy cleaning, monitoring, and final cleaning.

In post-construction cleaning, the goal is clear: Clean and remove debris without causing damage, whether on a small or large scale, corporate, large companies, small companies, and residences.

SERVICES

OUTSOURCING

Outsourcing is already in our lives and is here to stay. With the heated market, it becomes viable for many inexperienced companies to open, taking risks and causing various inconveniences.

Fundamental began its operations in 1998 and has maintained an active client portfolio since its foundation.

What sets us apart is the strict control of actions—whether operational, logistical, or administrative—and the frequent training of our employees. We prioritize our tax and labor areas, thus offering security to both employer and employees.

REASONS TO OUTSOURCE:

By hiring an outsourced service, the organization eliminates concerns with secondary services and can dedicate all its energy and time to its core business.

INCREASED SERVICE QUALITY: By hiring our services, you will have another great advantage: specialization. With Fundamental Limpeza, you have experienced and qualified professionals.

COST REDUCTION: In the medium and long term, outsourcing labor can reduce your company's costs. This happens because our service is performed by qualified professionals. Fewer expenses are generated with employee turnover and less waste of equipment and products.

TIME OPTIMIZATION: With greater specialization and quality, in addition to a more fluid division of labor, time is better utilized. Processes that consume a lot of time and cause worry become our company's responsibility.

POSSIBILITY OF EXPANSION WITHOUT MAJOR INVESTMENTS: With time optimization, cost reduction, increased service quality, and a greater focus on your core business, there is a clear possibility for expansion and growth. This expansion does not require any major investment, making it simple to implement but with the potential to generate great results.

Because of all these advantages, Fundamental Limpeza can help your company leverage its business! Sounds interesting? Request a quote right now!
